PRODUCT RANGE PRESSING MACHINES

PRESSING MACHINES - FOR DELICATE SITUATIONS

The PVE pressing machine is a leader guided multifunctional machine, which is used to press sheet piles into the ground. During operation the pressing machine does not generate any vibrations. As the pressing machine presses the piles into the ground, rather than vibrating or hammering, the ground is not disturbed and the impact on the surroundings is almost zero. A perfect solution for your inner city foundation project.

PRESSING TECHNIQUE

The main principle is the use of the four hydraulic cylinders that push the sheet piles into the soil. Oil pressure is provided by the rig or an additional power pack. The four independently working cylinders are equipped with clamps holding the same number of sheet pile sections. Pressing one sheetpile section alternates holding to the other sections.

PRESSING MACHINES CAN DRIVE:

- U profiles
- Z profiles

HYDRAULIC PRESSING MACHINES

4240

4375

Pressure cylinder

Max. pressure	bar	350	350
Pull force (320 bar)	kN	500	850
Push force (320 bar)	kN	800	1250
Stroke	mm	440	550
Max. oil flow (per cylinder) L/min		120	365
Total weight (incl. clamps)	kg	6850	14.500

Hydraulic clamp

Max. working pressure	bar	350	350
Clamping force	kN	800	1250

Example: 4240Z for Z-profiles / 630-700 AZ frame

possible sheet piles: AZ 17 - 17-700 - 18 - 18-700 - 19 - 19-700 - 20 - 20-700 - 24 - 24-700 - 25 - 25-700 26 - 26-700 - 28 - 28-700 - 34 - 34-700 - 36 - 36-700 - 37 - 37-700 - 38 - 38-700 - 40 - 40-700 - 41 - 41-700 PZC13* - PZC18* - PZC26* PAZ5680

*with different jaws

Example: 750 AU frame

possible sheet piles: AU 14 - 16 - 17 - 18 - 20 - 21 - 23 - 25 - 26*

*with different jaws

Example: 580 AZ frame

possible sheet piles: AZ 46 - AZ48 - AZ50

Example: 600 PU frame

possible sheet piles: PU 18 - 22 - 25 - 32*

*with different jaws

PRESSING MACHINES FOR SHEET PILES

APPLICATIONS

- Urban areas and vibration sensitive projects
- Safe working close to existing buildings, under structures, railways etc.
- Suitable for nearly all soil types

ADVANTAGES

- Easily handled by only two people
- No vibrations, so no harm to surroundings
- Minimum noise compared to other foundation techniques
- Pressing of all U and Z form sheet pile profiles is possible
- Ballasted start-up equipment is not required
- Pressing single and paired sheet piles
- Installs coated piles
- Excellent quality
- Wide range of clamping solutions

DIESEKO GROUP

- Known for robust and reliable equipment
- Over 40 years of experience with a proven track record
- 24/7 worldwide support
- Large spare parts inventory
- World's largest rental fleet
- Consultancy and financing
- ISO 9001 certified

OFFSHORE

Established in 1974, Dieseko Group represents several brands in the foundation equipment industry, in four product lines: Piling Equipment, Piling & Drilling Rigs, Ground Improvement and Power packs. In our markets the company is represented by three brands: PVE Piling & Vibro Equipment, ICE International Construction Equipment and Woltman Piling & Drilling Rigs.

Dieseko Group engineers develop foundation equipment in accordance with the latest regulations. The experienced engineers in the sales and rental department have a profound knowledge of the equipment and are always standby to advise clients on their specific needs. Spare parts are in stock for all machines, which can be shipped quickly to dealers and clients worldwide, to avoid downtime on projects. Service engineers are available 24/7 to support clients on site. With over 60 dealers and branches worldwide, Dieseko Group is a reliable partner for all foundation contractors for consultancy, sales, rental and financing.
